

PROCEEDINGS OF THE ROYAL ENTOMOLOGICAL SOCIETY OF LONDON

SERIES C. JOURNAL OF MEETINGS

VOLUME 12

No. 13, 1947

REPORT OF THE COUNCIL, 1947.

During the year that has drawn to a close Council has continued in its attempt to restore and expand the Society's activities and to make such modifications and adjustments as were thought desirable for the smoother conduct of its business. Their efforts have been rendered more difficult than would normally have been the case by the deterioration in general conditions; nevertheless the year can justifiably be described as a successful one.

At a Special Meeting held in June it was decided to increase the annual subscription to £3 3s. 0d. as from 1st January, 1948, and simultaneously to reduce the entrance fee to £2 2s. 0d.; and the Bye-Laws were amended accordingly. The increase in the subscription has been well received, and Council is grateful for the evidence of the Fellows' continued support in furthering the work of the Society.

The first stage of the repairs to the premises was completed early in the year, and the Society's surveyor has made a detailed survey which will serve as the basis of further work it is hoped shortly to put in hand.

The insurance policies on the Society's property have been overhauled, in consultation with the surveyor, and the cover increased and extended in relation to present-day conditions.

At the Centenary Celebrations of the Chemical Society the Society was represented by the President, who delivered an address of greeting, and at the meeting of the British Association Professor G. D. Hale Carpenter acted as the Society's delegate.

The Honorary Secretary and the Hon. Miriam Rothschild attended the conference arranged at Brunnen in June by the Swiss League for the Protection of Nature as the Society's delegates. It was at the instance of the British delegates that this conference ultimately decided to set up a provisional organisation which would be subject to the approval of the fully international conference which UNESCO has been asked to call in 1948 in Paris.

In the early summer the Society was requested to submit the names of two prominent members of Council to attend Their Majesties' Garden Party held at Buckingham Palace on 25th July. Professor Carpenter and the Honorary Secretary received invitations and attended.

A Loyal Address of congratulation in the following terms was presented to His Majesty the King on the occasion of the marriage of Her Royal Highness the Princess Elizabeth with His Royal Highness the Duke of Edinburgh:

TO THE KING'S MOST EXCELLENT MAJESTY

May it please YOUR MAJESTY, we the President and Council of the Royal Entomological Society of London desire to express our deep

sense of loyalty and devotion, and to present our humble congratulations on the occasion of the marriage of HER ROYAL HIGHNESS THE PRINCESS ELIZABETH with LIEUTENANT PHILIP MOUNTBATTEN, ROYAL NAVY.

We are deeply conscious of the sympathy and courage shown by YOUR MAJESTY, YOUR MAJESTY'S GRACIOUS CONSORT HER MAJESTY THE QUEEN, and HER ROYAL HIGHNESS THE PRINCESS ELIZABETH in the trials through which the nation and empire have recently been called upon to pass; we earnestly pray that YOUR MAJESTY may long be spared in health to reign over us and to see the fruits of scientific research used solely for the greater benefit of mankind, so that HER ROYAL HIGHNESS THE PRINCESS ELIZABETH and LIEUTENANT PHILIP MOUNTBATTEN may enter together an era of fulfilled hopes among a happy, prosperous and united people.

The following reply was received from the Home Secretary :

Sir,

I have had the honour to lay before The King the loyal and dutiful Address of the Royal Entomological Society of London on the occasion of the marriage of Her Royal Highness the Princess Elizabeth with His Royal Highness the Duke of Edinburgh.

I have it in command from The King to convey to you, as President of the Society, the sincere thanks of Their Majesties for the kindness and cordiality of these congratulations and good wishes for the future happiness and prosperity of Their Royal Highnesses, which They were specially pleased to receive on this happy occasion.

I am, Sir,

Your obedient Servant,

J. CHUTER EDE.

Close touch has been maintained with the Biological Council, and Dr. J. W. Evans has represented the Society at its meetings, at which, amongst other things, further consideration has been given to the scheme to establish an Institute of Biology; the distribution of contents lists of a limited number of Biological Journals has already commenced. The Society has promised its co-operation in a scheme, initiated by the Science Library and sponsored by the Biological Council, for the provision of photostat copies of papers in scientific journals at very reasonable rates.

The Council has continued to keep an eye on areas of biological interest, the scientific value of which might be endangered by post-war planning schemes, and has associated itself with protests made on various occasions.

The Protection Committee are pleased to report that they were again able to take steps towards the protection of *Melitaea cinxia* in the Isle of Wight and *Acidalia immorata* in Sussex. The welfare of *Maculinea arion* in Cornwall is being watched. Considerable difficulty is being experienced in the upkeep of Wood Walton Fen, the high cost of labour and continued drainage of the Fens being two major factors operating against the welfare of *Lycæna dispar*.

The customary twelve meetings have been held during the year and efforts to extend the scope and increase the interest of the meetings have been well rewarded by the slightly increased average attendance of 75 as compared with 67 in 1946. Council has been greatly helped by a small sub-committee in reviewing the organisation of General Meetings, and the catering and printing of minutes and agenda they entail. In view of the recommendation of this sub-committee that occasional meetings be held in the summer

months to enable overseas visitors to attend, Council has decided that in future meetings be held on the first Wednesday in each month, except January (when the Annual Meeting shall be held on the third Wednesday) and August.

Arrangements were also made for a limited number of Fellows to dine together after General Meetings, thus enabling them to meet informally and entertain visiting entomologists.

Much of the detailed business of the Society has, as hitherto, been conducted by the Finance and House Committee under the Chairmanship of Mr. G. Fox-Wilson, and the Publication and Library Committee under the Chairmanship of Mr. J. F. Perkins, for whose help the Society is very grateful.

The use of the library has been maintained and increased during the year, the number of books borrowed being 1,287 (1,167), the number of Fellows borrowing books being 666 (681) represented by 160 borrowers; 138 (85) books were lent to the National Central Library. Good progress has been made with binding and the arrears of cataloguing are gradually being dealt with. (The numbers in brackets throughout the report indicate the corresponding figures for the previous year.)

The Society's premises are still used as the Publication Office of the International Commission on Zoological Nomenclature and as the offices of the Society for the Bibliography of Natural History.

The loan of the Eltringham Microscope to Mr. W. S. Richards was renewed, no other demand having been received for the instrument.

The Society's new printers have now completed the first year's publications, and their work has not called forth any adverse comments from the rather critical public to which it is distributed. A change of this sort occurring under present conditions of all round shortages, however, brought many difficulties with it, which are being gradually overcome.

Some progress has been made with the proposed publication of a series of Handbooks on British Insects, and Council is happy to report that financial support for the project is forthcoming from the Royal Society. A printer's estimate for the production of these books has been accepted, negotiations for a supply of paper are proceeding very favourably, and the manuscript for the first parts will shortly be sent to the printers.

The *Transactions* for 1947 (Volume 98) contain eleven papers, of which three deal with Hemiptera, three with Lepidoptera, one with Coleoptera, one with Diptera, one with Odonata, one with Corrodentia, and one with General Entomology. Very welcome assistance was received from the Royal Society who defrayed the cost of Dr. Evans' paper, and Trinity College, Dublin, kindly contributed £50 towards the cost of Dr. Beirne's paper. The Society is very grateful for these grants which made possible the publication of these two important papers. The volume consists of 496 pages and 5 plates.

The *Proceedings* were continued in the usual three series, as follows :—

Series A (General Entomology). Volume 22 consists of 122 pages and contains 24 papers illustrated by one plate.

Series B (Taxonomic Entomology). Volume 16 consists of 163 pages and contains 34 papers illustrated by three plates.

Series C (Journal of Meetings). A part of *Series C* was sent to each Fellow in advance of meetings and a complete copy of the volume will be distributed with the last part. An attempt is also being made to make the accounts of General Meetings rather more informative.

During the year the death of 2 Special Life Fellows—Professor R. Newstead and the Rev. George Wheeler—and 9 (8) Ordinary Fellows has been reported : J. H. Grant, S. Hadwen, A. Moore Hogarth, R. S. MacDougall, G. H. Murray, C. Smee, J. A. Stephens, the Rev. A. Thornley and L. Williams.

The following 33 (12) Fellows have resigned : E. Ashcroft, Lt. Col. F. M. Bailey, C.I.E., J. M. Brown, B.Sc., H. F. Carter, Major General Sir Gordon Covell, C.I.E., M.D., I.M.S., B. H. Crabtree, A. R. Daniel, F. K. Eirisch, E. T. Ellis, A. F. E. Friedlein, R. Gamble, F. D. Goodliffe, M.A., A. Hall, G. D. Hayes, G. M. Henry, J. Herrod-Hempsall, F. F. Laidlaw, M.R.C.S., L.R.C.P., H. B. Lawson, W. Mansbridge, M.Sc., M. J. Manski, J. E. M. Mellor, M.A., M. E. Mosely, Professor W. S. Patton, M.B., Lt. Col. F. B. Scott, S. K. Sen, M.Sc., J. D. Shapland, R. Temperly, A. E. Tonge, L. J. Walford, M. J. Way, F. G. M. Westropp, T. W. Wilbraham and L. G. O. Woodhouse.

The following 2 (4) have been removed from the list of Fellows in accordance with the Bye-Laws, Chapter XVI, Section 3 : E. Cameron and Lt. Col. E. M. Rice.

During the year one Special Life Fellow—Mr. H. M. Edelsten—and 70 Ordinary Fellows have been elected, of whom 57 have completed their obligation. In addition, 9 Fellows elected in 1946 completed their obligation in 1947. This has meant a slight increase in the number of Fellows, and the Society now consists of 5 Honorary Fellows, 10 Special Life Fellows and 806 Ordinary Fellows, a total of 821. It is most gratifying to see the upward trend continued in spite of the adverse circumstances now prevailing which have necessitated an increase in the annual subscription.

The Council will continue to make every effort to see that the interests of Fellows are catered for as fully as the times permit.

TREASURER'S REPORT.

Mr. A. Welti said :—

This is the sixth occasion on which I have the pleasure to present the annual report and Accounts to you.

The improvement in the general state of affairs, for which everyone had hoped, has not set in and our expenditure has exceeded income by £135 12s. 2d. As, however, sundry small credit balances had been carried forward from the previous five years, the final result is that, instead of carrying forward a Credit Balance of £254 12s. 7d. as at the end of last year, the Credit Balance carried forward this year is £119 0s. 5d.

Subscriptions totalled £1,657 compared with £1,617 in 1946, and Sales of Publications amounted to £2,051 as against £2,317 and are thus £266 lower. There has been a large volume of work connected with the Sale of Publications and our special thanks are due to our Staff for having dealt with it so conscientiously and efficiently.

Our total income from Investments last year was £292 as against £303 in the previous year. This was due to the repayment of several of our old Investments and the difficulty of re-investing in Securities which would bring in a fair rate of interest. The Industrial Shares, which I mentioned last year, were realised and the money re-invested in Gilt Edged Securities.

Owing to the addition of accrued Admission Fees, our Investments in Capital Reserve Account stand at £7,648 as against £7,231 last year.

Throughout the year it has been possible to keep an adequate Credit Balance with our Bankers and the deposit of £2,000 in the Post Office Savings Bank has remained intact. All accounts have been promptly paid.

The first War Damage Repairs, which were mostly to the roof and the upper storeys, cost us £248 9s. 9d. We are still awaiting refund of the major part from the War Damage Commission. There is a great deal more to be done to repair the building and restore its amenities, and it is hoped that we shall get permission from the Ministry of Works to carry out further necessary repairs during the current year.

Gratitude must be expressed for the liberal donations towards the cost of our Publications. Had it not been for these, it would have been impossible to maintain the volume and quality of the publications issued during the past year. The cost of publishing has become a grave matter and it was chiefly for this reason that early in the year, our Finance Committee recommended the Council to increase the annual subscription of Fellows from £2 2s. 0d. to £3 3s. 0d. This decision was generally favourably received and only 17 Fellows resigned. Among these were Fellows who are finding the times difficult, and our Council intends to give this subject further consideration during the coming year.

At the same time that the increase in the annual subscriptions was made, our Council decided to reduce the admission fees from £3 3s. 0d. to £2 2s. 0d. in order to help young men when joining our Society. This year admission fees totalled £188 against £318 last year.

You will have noticed the improvement in the general appearance of the Library. We have spent £212 on binding and rebinding. There still remains a lot to be done and every effort will be made in the New Year to improve the state of affairs. In regard to the Library Catalogue, the matter has not been forgotten, but before the job is undertaken, the Library itself must be as up to date as possible.

The work on the Handbooks has been started and we acknowledge with thanks a donation of £600 from the Royal Society. When this task is complete, it will be a great achievement.

The Accounts have been audited by our friend, Mr. Taylor of Messrs. W. B. Keen & Co., who have continued as our Auditors and Advisers. The Accounts now laid before you give you all the items of Income and Expenditure. In the present times, the result must be deemed satisfactory. Let us hope that fortune may favour us, so that in the coming year a Credit Balance may be achieved.

To our President and to Mr. Fox-Wilson, the Chairman and all the Members of the Finance Committee and to the Staff, I express my warmest thanks for the kind and friendly support and help they have always been so ready to give me during the past year.

THE PRESIDENT'S REMARKS.

It is the duty of the President, at the Annual Meeting, to comment on the affairs of the Society, so I would like to take the opportunity of congratulating everyone, in view of the extremely successful ending to a difficult year. Our membership has risen by nearly twenty. The proposed rise in the subscription has been well received and has lost us fewer members than we feared, and we are only down on our accounts a matter of about £100. In view of the fact that we have capital reserves of over £7,000, the small loss is of no consequence. Indeed, I would welcome a greater excess of expenditure over income in the coming year, if it meant that our Library and publications would benefit. Our Library is one of the best forms of capital investment, and an increase in the size of our publications and in the number of copies printed is not only a benefit to our fellows and to the Science of Entomology, but it is also a source of income in the future by the sales of publications.

I am sorry to say that ten of our Fellows have died during the year, and in addition we have received notification of another who died in 1946 and another who was lost at sea during the war. The following are some brief notes which in no way, however, can express our sense of loss.

Capt. J. A. STEPHENS joined our Society in 1943 and died on 4th March, 1947 at the age of 65. He had always been interested in natural history, but late in his life he became specially interested in the British Coleoptera, and was a keen collector, especially in the Cobham Park district.

The Rev. A. THORNLEY, who joined the Society in 1892, died in 1947 at the age of 91. He had been a Fellow for 54 years. He graduated at Merton College, Oxford, and had a wide interest in Natural History, particularly in its importance for school education. He spent his later years in Cornwall.

Dr. S. A. HADWEN, who joined our Society in 1919, died on 25th April, 1947, at the age of 70. He was born in England, but at an early age moved to Canada and obtained a degree in Veterinary Science at McGill University in 1902. Throughout the rest of his life he remained in North America, working in Ottawa, British Colombia, Alaska and Saskatchewan. In 1929 he became Director of the Department of Veterinary Science, Ontario Research Foundation, from which he retired in 1942. Most of his entomological work was in the field of Animal Parasitology, including studies of Ticks and Warble-flies.

Mr. J. H. GRANT, who joined our Society in 1924, was an enthusiastic amateur entomologist, whose associations were chiefly with the Birmingham district. He was for twelve years Secretary of the Entomological Section of the Birmingham Natural History and Philosophical Society. His main entomological interest was in British Lepidoptera, but he also had a large collection of exotic Lepidoptera and Coleoptera, and had wide interest in other fields such as Malacology and Archaeology.

Mr. A. M. HOGARTH joined the Society in 1922 and died in 1947 at the age of 70. He was particularly interested in Economic Entomology and Mosquitoes.

Mr. C. SMEE joined the Society in 1920 and died in 1947 at the early age of 51. He was unmarried. His work was in the field of Applied Entomology and for about twenty-four years he was Government Entomologist for Nyasaland.

Mr. J. J. WARD joined our Society in 1910 and died in 1946. He was a keen amateur naturalist and one of the founders of the Natural History Society in Coventry, where he lived.

Mr. L. WILLIAMS became a Fellow in 1945 and died in 1947. He was particularly interested in Beekeeping, and was at one time Queen Rearer with E. H. Taylor, Ltd., of Welwyn.

Mr. G. H. MURRAY became a Fellow in 1914. He was for some years out in the East Indies and published several papers on agricultural pests, including insects attacking coconut palms. He became Director of Agriculture at Rabaul, New Guinea. He was lost at sea when a prisoner of war in Japanese hands, but confirmation of his death has only just reached us.

Dr. R. STEWART MACDOUGALL, who died in Edinburgh on 28th March, 1947, at the age of 85, had been a Fellow since 1910; was Vice-President of the Society in 1929, and twice served on the Council. His main interests lay in the field of British Agricultural, Veterinary and Forest Entomology, and he was for 36 years Consulting Entomologist to the Royal Agricultural Society of Scotland. He will be best known to many for his outstanding ability as a teacher. He was Lecturer and later Reader at the University of Edinburgh for over twenty years, and his lectures were famous for the way he encouraged and held the enthusiasm of his hearers. He was also Professor Emeritus of Biology at the Royal (Dick) Veterinary College in Edinburgh. He is survived by his second wife and a daughter.

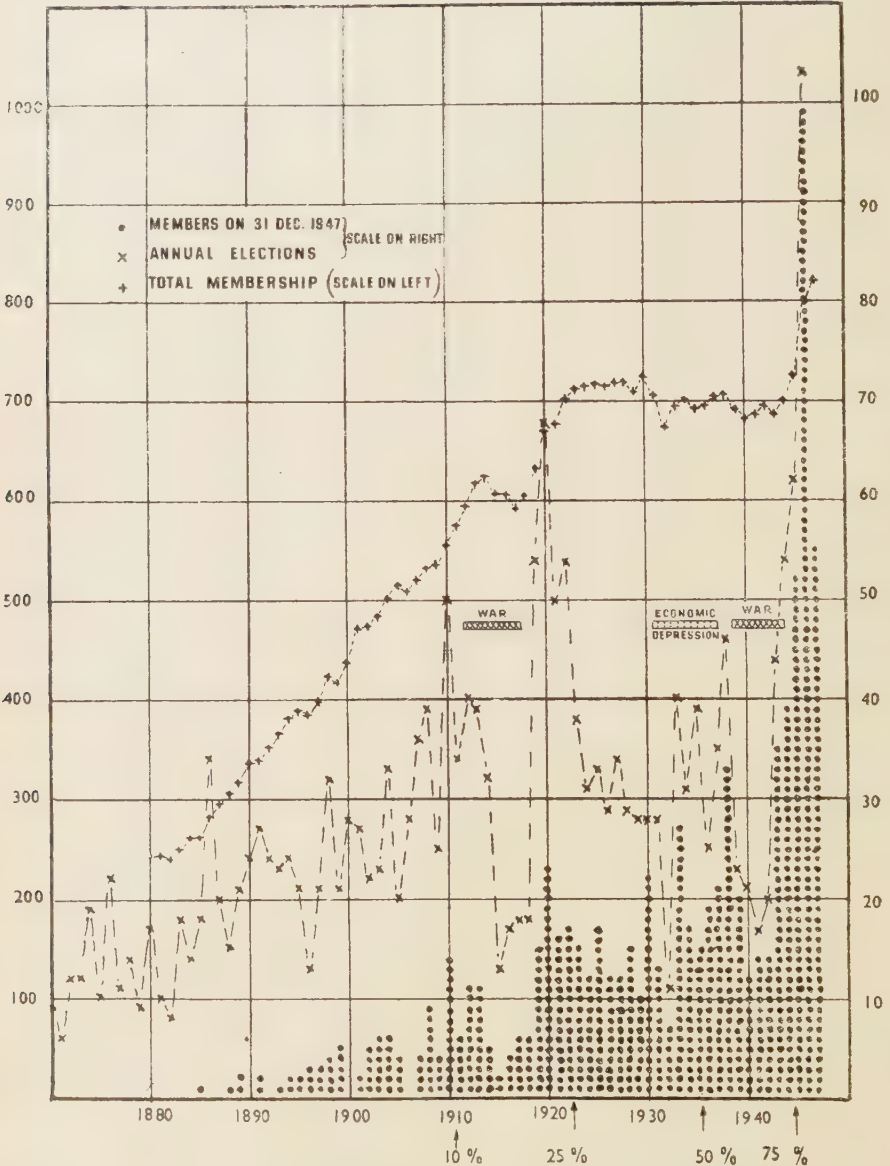

The Rev. A. MILES MOSS died on 7th January, 1948, at the age of 75. He had been a Fellow since 1911. He took his degree at Cambridge in 1897 and in 1907 went out to South America. He lived in Peru from 1907 to 1910, and in Brazil at Para on the Amazon from 1911 to 1945. He formed great collections of Brazilian insects, chiefly Lepidoptera, the majority of which are now in the British Museum. He bred many species of which the life history was unknown and his collection included many larvae and pupae and drawings of early stages.

The Rev. G. D. CHETWYND WHEELER, who died on the 9th December, 1947, became a Fellow in 1906 and was elected a Special Life Fellow in 1933. He was Secretary of the Society for ten years from 1911 to 1921, Vice-President in 1914, and on the Council in 1921. Early in life he was a keen collector of the British Macrolepidoptera, with special interest in the problem of variation. He worked in collaboration with the late J. W. Tutt and when the latter died he finished off one of the volumes of Tutt's *British Butterflies*. His interest spread to the Continent and he wrote in 1903 a Handbook of the Butterflies of Switzerland, which makes a special feature of variation. He was associated with the Editors of the Entomologists Record and Journal of Variation for over fifty years.

Prof. ROBERT NEWSTEAD, F.R.S., died in Liverpool on 21st February, 1947, at the age of 87. He joined our Society in 1890 and had thus been a member for 57 years. In 1926 he was elected a Special Life Fellow. His work was chiefly in the field of Medical Entomology and he was appointed Lecturer in Entomology and Parasitology at the Liverpool School of Tropical Medicine in 1905, and in 1911 was the first holder of the Dutton Chair of Medical Entomology at this school. He was elected an F.R.S. in 1912. It is impossible to do justice in any short space to his activities in Entomology which ranged from systematic studies in Scale Insects and Mosquitoes to official visits to many parts of the world to give advice on insect control. He was an outstanding figure and his achievements were all the more remarkable in that his early days were passed in poor circumstances and he received no University training. Apart from his brilliant reputation as an entomologist, he was also in the first rank as an archaeologist and was associated with most of the recent excavations in the Chester district.

To end my remarks, I thought that it might interest Fellows to see a graphical analysis that I have made of our recent and present memberships.

The figure shows three separate sets of figures. The upper line is our total memberships each year from 1881 to the present date (scale on left). This starts at about 240 members and rises steadily to about 625 in 1914. The increase received a check during the First World War, but rose again afterwards to between 710 and 720 in 1922. From this time to 1944 there was a definite check to the expansion of numbers, and even a fall during the financial crisis of 1932, so that in 1944 our numbers were only just over the 700 mark. Since the Second World War ceased our numbers have increased very rapidly to the present total of 821.

Analysis of recent and present membership of the Society.

The check in increase from 1922 is puzzling, and it is curious to note that about that time we raised our subscription from £1 1s. 0d. per annum to £2 2s. 0d. It is, however, difficult to believe that this increase, only proportional to the general cost of living, could be the cause of such a definite check. About this period also we took over our premises in Queen's Gate, which have made such a difference to the facilities available for Fellows that one would have expected an increase rather than a check.

The second more irregular line shows the number of new Fellows elected each year. The noticeable features are the rise from 1870 to 1910; the big fall off during the First World War; the rapid but rather short-lived recovery afterwards; the extreme drop in 1932, during the world financial crisis, in which year fewer Fellows were elected than in any year since 1882 and in any year since; the check during the Second World War; and the very great increase in the immediate post-war years, reaching a record of over 100 new Fellows in 1946.

The third set of figures are the dots at the bottom, and they show the year of election of all Fellows who were in the Society's register at the end of December, 1947. Underneath the diagram are shown arrows indicating 25, 50 and 75 per cent. of the total membership.

The first point of interest is that we have no fewer than 17 Fellows who have been in the Society for over fifty years. The Doyen of our Society is Mr. R. W. Lloyd who has been a Fellow for 63 years, and it is a very great pleasure to all of us to see that he is present tonight at this meeting.

Other points of interest are that twenty-five per cent. of our present Fellows have joined within the last three years, and fifty per cent. have joined within the last twelve years.

If our Society can continue to keep the wisdom of the older members, and still have the young blood of the new, we can look forward with confidence to the years to come.
